PEPLINK'S SD-WAN: SPEEDFUSION
CORE TECHNOLOGIES

peplink

WAN Smoothing

Use multiple WAN connections to create a single, jitter-free data stream.

PepVPN

Offers the benefits of IPsec, plus a variety of performance and reliability features.

Bandwidth Bonding

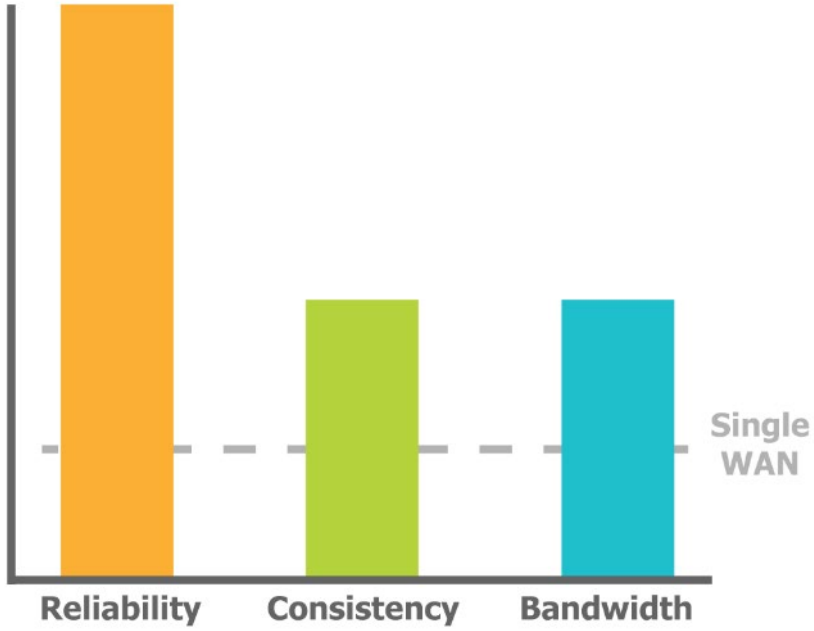
Combine the speed and bandwidth of multiple WAN connections.

Hot Failover

Switch from one WAN connection to another while keeping your sessions intact.

HOT FAILOVER: SPEEDFUSION

Enables you to change connections while keeping your session intact.



Useful for deployments where you need reliability while keeping costs down.

WHERE DO YOU LACK INTERNET ACCESS?

FIXED WIRELESS ACCESS (FWA)

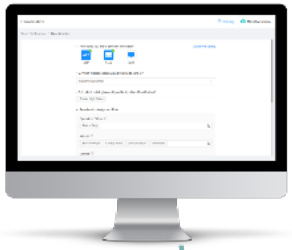
CRISISGO: RECOVERY

Step 1: Initiate Reunification Event



Step 2: Account for Students

- Students at the reunification site are accounted for by staff via the mobile tool or can self-scan into the kidhold.

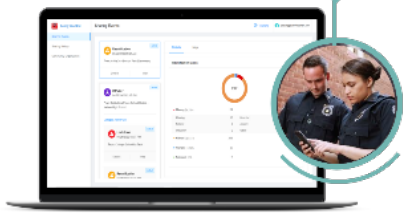
Step 3: Notify Parents

- Starting with parent communication.
- Parents receive guidance and a digital QR Code to pick up students at the designated reunification site.

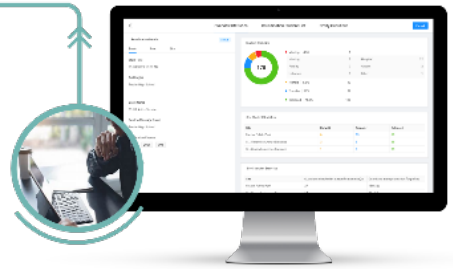
Step 4: Greet Parents

- At the reunification site, greeters scan the parent's digital ID and know which kid(s) to pick up via mobile phones, verifying the parent's identity.

CRISISGO



(Optional) Sharing Event Data with First Responders



School Admin Monitor Event Progress

- Administrators oversee event progress with real-time data, guide the team or communicate with parents.

Step 5: Reunify Parent & Kids

- After confirmation with the student, the parent signs a digital signature in the app, and then they will be free to leave.

CRISISGO: PREVENTION

Anonymous Reporting

- Report bullying and bully-related activity.
- Submit safety tips about incidents, threats, and concerning behaviors.
- Disclose those at risk for suicide.
- Report safety issues with multi-media reporting options.

Two-Way Communication

- Communicate with the school safety team during an incident.
- Learn about safety risks and solutions.
- Respond to safety check-in prompts sent by school administrators.
- Activate a digital panic button and drop a GPS pin of their location during emergencies.
- Access safety resources during an emergency event.

T-MOBILE FOR GOVERNMENT

T-Mobile is America's leader in 5G. See what independent experts are saying.

T-MOBILE FOR GOVERNMENT

Opensignal: Opensignal US Mobile Network Experience 5G, July 2023 Based on independent analysis of average speeds from mobile measurements recorded during the period March 16 – June 13, 2023, © 2023 Opensignal Limited **5G:** Capable device required for 5G; coverage not available in some areas. Some uses may require certain plans or features; see T-Mobile.com.

T-Mobile is America's network leader. See what independent experts are saying.

OOKLA

T-Mobile's network once again earned top rankings for fastest speeds, most consistent, best video, lowest latency, best 5G speed performance and 5G availability.

OPENSIGNAL

T-Mobile dominates the awards table again, with six outright wins out of a possible eight.

T-Mobile strengthens its lead for both speed awards and is the first U.S. carrier to win the new Consistent Quality and Live Video Experience awards.

umlaut
Part of Accenture

In its latest 5G Network Performance Audit Report, T-Mobile once again had the overall highest 5G score with the best coverage, stability and speeds.

T-MOBILE FOR GOVERNMENT

Ookla: fastest based on the median, overall combined speeds according to an analysis by Ookla® of Speedtest Intelligence® data download speeds for Q1 2023. WIRELESS PRIORITY SERVICE (WPS)

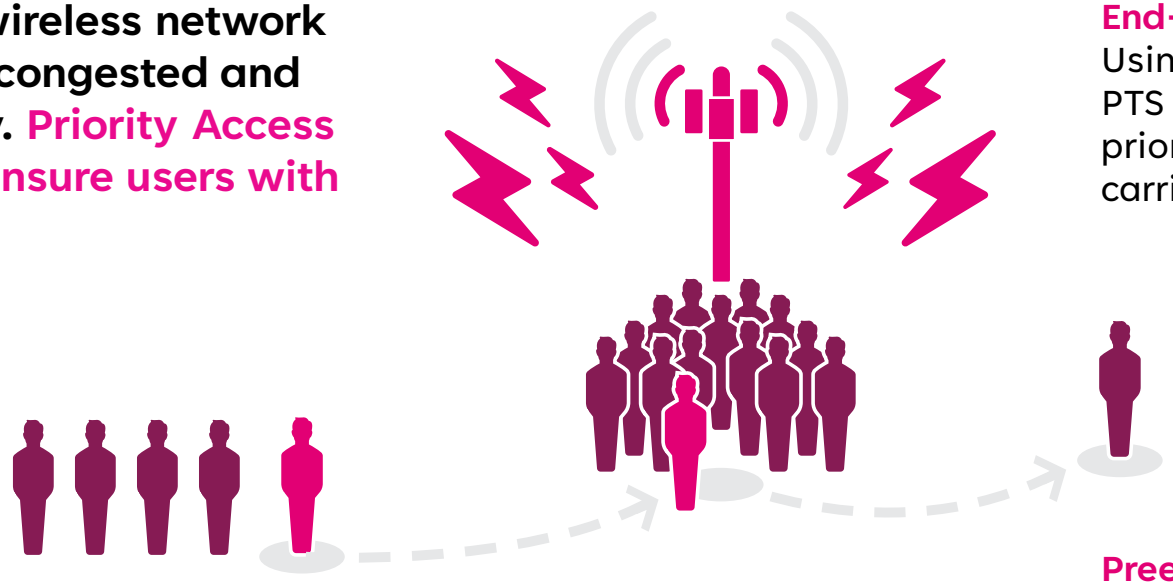
In an emergency, the wireless network may become severely congested and reach 100% of capacity. Priority Access and preemption help ensure users with WPS still get through.



Priority access
T-Mobile subscribers with WPS get moved to the front of the communication line.

End-to-end prioritization
Using WPS by dialing *272 or the PTS Dialer app ensures end-to-end prioritization, regardless of which carrier is at the other end.

Preemption
If necessary, a customer without WPS will be dropped to make room for one with WPS.

PREMIER WIRELESS™

WPS functionality (including priority access and preemption) may not be available while roaming. Completion of calls not guaranteed.
